

## Camera/Camcorder Light

# LED30

Thank you for purchasing the PROMASTER® LED30 Camera/Camcorder Light.

**Please read the following instructions before use.**

### Installing the Batteries

Gently remove the cover on the back of the light.

Insert 2 AA batteries (not included) into the battery compartment.  
Be sure to observe the correct polarity (+,-) as indicated.

After the batteries are properly installed, use the on/off switch to power the light.

### Mounting the LED30 Light

You can mount your LED30 Camera/Camcorder light to the built-in accessory shoe on your camera or camcorder. If your camera or camcorder does not have an accessory shoe, use the included mounting bracket as follows:

Connect screw (**A**) to the tripod mount of your camcorder/camera.

Slide your light into the accessory shoe (**B**) of the bracket
